DETAILED ACTION

Applicant's preliminary amendment filed 28 June 2002 is acknowledged and entered. The new claims 20-52 are added. Currently, claims 1-52 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 10-13, 20, 25-41, drawn to drawn to polynucleotides comprising SEQ ID NO 1 and 3, polynucleotides encoding proteins comprising the amino acid SEQ IN NO 2 and 4, a complementary to the polynucleotide, a vector, and transformant comprising the polynucleotide and method of using the polynucleotides to produce protein.

Group II, claim(s) 9 and 21-24, drawn to proteins.

Group III, claim(s) 14, 42-45, drawn to antibodies against the protein encoded by SEQ ID NO 1-4.

Group IV, claim(s) 15-18 and 46-50, drawn to an immunological assay and method for screening a substance regulating apoptosis cell proliferation or cell death.

Group VI, claim 51, drawn to a method for regulating cell proliferation or cell death comprising administering the compound to a plurality of cells.

Group VII, claim(s) 19 and 52, drawn to therapeutic agent for disorders characterized by cell proliferation or cell death.

A national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. When claims to different categories are present in the application, the claims will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories: (1) A product and a process specially adapted for the manufacture of said product; or (2) A product and a process of use of said product; or (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or (4) A process and an apparatus or means specifically designed for carrying out the said process; or (5) A

Art Unit: 1642

product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application will be considered as the main invention in the claims, see PCT article 17(3) (a) and 1.476 (c), 37 C.F.R. 1.475(b) and (d). Group I will be the main invention. After that, all other products and methods will be broken out as separate groups (see 37 CFR 1.475(d).)

Group I invention is directed to a polynucleotides comprising a vector to host cells which maintain and produce the polynucleotides and method of expression of the proteins encoded by the polynucleotides. Pursuant to 37 C.F.R., the main invention in the instant application comprises the first recited product. It is noted that claim 12 is the first mentioned method of using the polynucleotide. The other claimed product in invention group II and III comprise physically and functionally distinct chemical entities, which share neither structure nor function, and thus, they do not share a special technical feature within the meaning of PCT rule 13.2 and thus do not relate to a single invention concept within the meaning of PCT rule 13.

The additional methods of groups IV-VII do not correspond to the main invention, as they are neither a method of making, nor a method of using said composition. Therefore, the groups are not considered to share a special technical feature with the main invention within the meaning of PCT Rule 13.2, and thus do not relate to a single invention concept within the meaning of PCT Rule 13. 1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
